Concentric Maxi Torque (CMT®) Our new, patented Hub-to-Shaft Connection System offers exceptional Concentricity and High Torque Capacity for small to medium rotary drive components.

CMT® out performs other shaft connection systems :

- Lower component run out and reusable – unlike Set Screws and Pins
- Maintains both axial and rotational position – unlike standard Keyways
- Less space required – unlike Clamp Collars and other bulky attachment devices

Timing Belt Pulleys

- MXL (.080"), XL (.200"), L (.375") and H (.500") Profile
- 3M, 5M, 8M HTD® Profile
- 2MM, 3MM, 5MM, 8MM PGGT® Profile
- T2, T2.5, T5, T10, T20 Profile
- AT5, AT10, AT20 Profile
- 40 DP (.0816")
- ZERO BACKLASH also available

Other Products

- Flanges
- Timing Belts
- Idler Pulleys
- Spur Gears
- Sprockets
- Round Belt Pulleys
- V-Ribbed Pulleys
- Clamp Plates for Synchronous Belting

Available in Aluminum, Steel, Stainless, Brass and all Engineered Polymers

Pulley Stock Program

72-HOUR SHIPMENT GUARANTEE *

Any Pitch and Number of Teeth Available

Value Added Services

Flexible Delivery: Split, Kanban, JIT, etc.

One-Stop-Source: Matching flanges and belts for pulley stock

Contract Services

- CNC Turning
- CNC Milling
- Gear Cutting, Hobbing, Shaping
- Broaching and Honing
- Assemblies: Bearings, Shafts, etc.

Laser Engraving Services

Industrial, Machined Parts, Medical, Electrical

Experts in high-tech materials such as ceramics and graphic composites
