

ATX West 2016 Invite

Enjoy free expo admission!

Join CMT on February 9-11 at the Anaheim Convention Center for the 2016 ATX West event in Booth 4142.

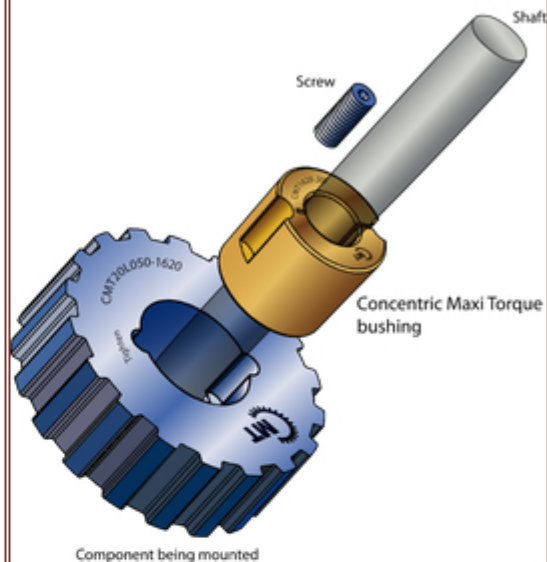

CMT has been a U.S. manufacturer of timing pulleys, drive systems and components for the motion control and power transmission markets since 1964.

At the show we will demonstrate the benefits of our revolutionary keyless hub-to-shaft connection system, called Concentric Maxi Torque®. The CMT system eliminates the need for unreliable connection methods like keyways and set screws with its single lateral screw design.

To take advantage of complimentary expo admission, specify the Source Code 'JOINUS' when registering by clicking on the E Invite below.

Precise. Reliable. Trusted.
