## **CMT® Expands Capabilities with New Tooth Profiles**

**Hanover, MA** – April 18, 2016 - Custom Machine & Tool Co., Inc., a leading USA manufacturer in the power transmission and motion control products industry, announced today it will be adding another metric profile to the company's line of pulleys and pulley stock.

Joining the 72-Hour GUARANTEED Delivery on Pulley Stock Program is the AT-3 Metric Profile. The AT-3 compliments this timing pulley stock program which also includes the AT-5 and AT-10 Metric Profiles.

Custom Machine & Tool Co., Inc. is also adding the 3mm, 5mm, 8mm Goodyear Super Torque Pd® Profiles. Goodyear enthusiastically promotes the Super Torque Pd® as “the next evolution in synchronous drive belt development from Goodyear.” The Super Torque Pd® belts have a unique modified round tooth design that minimizes tooth shear and operates quieter than traditional trapezoidal tooth profiles.

“We are thrilled to continue investing in manufacturing capital equipment which allows us to expand and showcase our products in the power transmission and motion control product industry”, says owner and President of Custom Machine & Tool Co., Inc., Robert Bennett.

Custom Machine & Tool Co., Inc. manufactures timing pulleys; the patented **CONCENTRIC MAXI TORQUE** keyless hub to shaft connection systems; drive systems; and components for the motion control and power transmission markets.

To learn more about Custom Machine & Tool Co., Inc.'s expanded product line, contact the company at 781-924-1003, email to [info@cmtco.com](mailto:info@cmtco.com) or visit the website at [www.cmtco.com](http://www.cmtco.com).
